Address: IFP Group, 2313, Beckman Institute, UIUC, Champaign, IL, 61820, USA

RESEARCH INTEREST

My research interest is unsupervised and semi-supervised learning for data representation and understanding, and its applications in human-computer interaction and image processing. Specifically, I am interested in multi-domain or multi-model data representation using cutting-edge generative models like GAN or VAE, and correspondingly applying the models to face or action analysis and medical image processing etc. Besides, I am also conducting image de-noising projects recently.
